

APPENDIX 2

CREDIT AND COUNTERPARTY CRITERIA POLICY

The Council recognises the need for security of principal to be of paramount importance. In recognition of the need to minimise risks associated with its treasury management activities, credit rating criteria, as outlined below will be used to select counterparties with whom the council will place funds. Treasury management staff will analyse all counterparties prior to investing funds.

Unrated subsidiaries can be used providing there is an unconditional guarantee from a rated parent.

Rating Symbols

Gradations of creditworthiness are indicated by rating symbols, with each symbol representing a group in which the credit characteristics are broadly the same.

Moody - The Moody's rating scale runs from a high of Aaa to a low of C, and comprises of 21 notches. It is divided into two sections, investment grade and speculative grade. The lowest investment grade rating is Baa3. The highest speculative grade rating is Ba1.

Fitch - The Fitch rating scale runs from a high of AAA to a low of D, and comprises of 21 notches. It is divided into two sections, investment grade and speculative grade. The lowest investment grade rating is BBB. The highest speculative grade rating is BB. Thus, the use of credit ratings defines their function: "investment grade" ratings (international long-term 'AAA' - 'BBB' categories; short-term 'F1+' - 'F3') indicate a relatively low probability of default, while those in the "speculative" or "non-investment grade" categories (international long-term 'BB' - 'D'; short-term 'B' - 'D') may signal a higher probability of default or that a default has already occurred.
