

ESTIMATED CAPITAL PRUDENTIAL INDICATORS 2018-19 to 2020-21

The Council's capital expenditure plans are the key driver of treasury management activity. The output of the capital expenditure plans are reflected in prudential indicators, which are designed to assist members overview and confirm capital expenditure plans.

The Local Government Act 2003 requires all local authorities to have regard to the Prudential Code for Capital Finance. The Code states that a soundly formulated capital programme must be driven by the desire to provide high quality, value for money public services. As a consequence, the Code recognises that in making its decisions to make capital investment, the Council must have regard to:

- affordability (e.g. implications for Council Tax);
- prudence and sustainability (e.g. implications for external borrowing);
- option appraisal;
- asset management planning;
- strategic planning for the Council;
- achievability of the forward plan.

The key objectives of the Code are to ensure, within a clear framework, that the capital investment plans of local authorities are affordable, prudent and sustainable. To demonstrate local authorities have fulfilled these objectives, the Code sets out the indicators that must be used and the factors that must be taken into account.

Under the Prudential Code for Capital Finance in Local Authorities, local authorities determine their own level of capital expenditure.

Capital Expenditure

This prudential indicator is a summary of the Council's capital expenditure plans.

Capital Expenditure	2017-18 Estimate £m	2018-19 Estimate £m	2019-20 Estimate £m	2020-21 Estimate £m
Regeneration work undertaken for the Council by Arch	4.491	13.943	10.392	0.000
Finance (Corporate Resources)	25.950	30.490	30.000	30.000
IT	5.051	7.336	0.740	0.000
Active Northumberland / Leisure Services	0.605	6.769	6.000	10.000
Regeneration	1.329	2.474	0.000	0.000
Property Services	1.053	2.170	2.000	2.000
Strategic Estates	2.246	6.413	5.685	8.700
Renewable Energy	1.692	1.000	1.000	1.000
Fire and Rescue Service	0.861	1.542	1.223	1.113
Neighbourhood Services	3.270	12.293	9.527	10.101
Technical Services / Local Services	43.152	37.930	26.832	30.531
Housing - GF	0.385	1.856	1.481	1.481
Housing - HRA	9.396	10.890	9.855	10.134
Planning and Development	0.250	6.400	12.500	81.499
Adult Services	2.368	1.118	0.737	0.000
Schools	17.347	59.851	50.458	22.400
Total Capital Expenditure	119.446	202.475	168.430	208.959

The table below summarises how the above capital expenditure is being financed by capital or revenue resources. Any shortfall of resources results in a funding borrowing need.

Capital Funding	2017-18 Estimate £m	2018-19 Estimate £m	2019-20 Estimate £m	2020-21 Estimate £m
External Grants	53.233	55.494	37.197	100.955
Capital Receipts	6.548	6.008	5.339	1.700

GF Contributions	0.086	0.000	0.000	0.000
HRA Contributions	8.674	10.478	9.752	10.034
GF Borrowing	50.905	130.495	116.142	96.270
Total Capital Funding	119.446	202.475	168.430	208.959

Capital Financing Requirement - the Council's borrowing need

The Capital Financing Requirement (CFR) is the Council's underlying need to borrow for a capital purpose.

All the capital assets the Council has ever bought will have been in part paid for by capital receipts, grants and revenue contributions. The remaining part which has not yet been paid for through revenue or capital resources is described as the CFR. In this respect it could be viewed like a mortgage. You have paid for the house (assets), have some equity in it (capital receipts etc.), but have not yet paid off the mortgage (CFR).

The CFR increases each year by capital spend, and decreases by both capital financing (capital receipts, grants etc.) and an annual revenue charge called the Minimum Revenue Provision (MRP).

The CFR shown below, which includes other long term liabilities such as PFI and leasing arrangements, is increasing by £227.6 million over the next three years and is shown below.

The Council is asked to approve the following CFR projections.

Capital Financing Requirement (CFR)	2016-17 Actual £m	2017-18 Estimate £m	2018-19 Estimate £m	2019-20 Estimate £m	2020-21 Estimate £m
General Fund CFR	817.687	838.413	937.837	1,1018.667	1,065.999
HRA CFR	105.144	105.145	105.145	105.145	105.145
Overall CFR	922.831	943.558	1,042.982	1,123.812	1,171.144
Movement in Year		20.727	99.424	80.830	47.332

Affordability Prudential Indicators

The previous sections cover the overall capital and control of borrowing prudential indicators, but within this framework prudential indicators are required to assess the affordability of the capital investment plans. These provide an indication of the impact of the capital investment plans on the Council's overall finances. The Council is asked to approve the following indicators:

Ratio of financing costs to net revenue stream

This indicator identifies the trend in the cost of capital (borrowing and other long term obligation costs net of investment income) against the net revenue stream.

Ratio of financing costs to net revenue stream	2016-17 Actual %	2017-18 Estimate %	2018-19 Estimate %	2019-20 Estimate %	2020-21 Estimate %
General Fund	5.8	7.5	7.9	9.6	11.8
HRA	11.9	12.1	12.0	12.4	11.9

The estimates of financing costs include current commitments and the proposals in the budget report.

Authorised Limit for External Debt

This is an important indicator, as it is part of the Local Government Act 2003 requirements.

The Authorised Limit is the maximum amount the Council could afford to borrow in the short term but would not be sustainable in the long term. It should be set at the expected borrowing position, plus any expectations for borrowing in advance of need, plus some headroom to cope with the unexpected.

It is set as an assessment of how much the Council may need to borrow above expectations if an unforeseen incidence happened. This could be the delay in a large capital receipt, the failure of the Council Tax system etc., something that upsets the cash flow but will be corrected over time.

So the Authorised Limit, if set properly, is an alarm mechanism that, if breached, means there is a problem with the Council's finances.

The Council is asked to approve the following authorised limit:

Authorised Limit	2018-19 Estimate £m	2019-20 Estimate £m	2020-21 Estimate £m
Borrowing	1,209.448	1,304.964	1,385.203
Other long term liabilities	86.637	82.779	78.769
Total	1,296.085	1,387.743	1,463.972

Operational Boundary for External Debt

Whilst the Authorised Limit is an overall cap on borrowing, the Operational Boundary is where the Council would expect its borrowings to be, assuming it was fully borrowed up to the anticipated CFR. It is only a guide and may be breached or undershot without significant concern, as borrowings will be driven by economic and market considerations as well as interest rates.

The Council is asked to approve the following operational boundary:

Operational Boundary	2018-19 Estimate £m	2019-20 Estimate £m	2020-21 Estimate £m
Borrowing	1,007.874	1,087.470	1,154.336
Other long term liabilities	72.198	68.982	65.641
Total	1,080.072	1,156.452	1,219.977

Treasury Management Limits on Activity

There are two debt related treasury activity limits. The purpose of these are to restrain the activity of the treasury function within certain limits, thereby managing risk and reducing the impact of any adverse movement in interest rates. However, if these are set to be too restrictive they will impair the opportunities to reduce costs / improve performance. The indicators are:

- Maturity structure of borrowing. These gross limits are set to reduce the Council's exposure to large fixed rate sums falling due for refinancing, and are required for upper and lower limits.
- Limit on Investments for longer than 365 days

Maturity Structure of Borrowing

Setting limits for the maturity structure of debt ensures a reasonable spread of maturing debt as a safety mechanism to ensure significant amounts of maturing debt is not ending at a time when interest rates for refinancing the debt may be high.

Maturity Structure of fixed rate borrowing during 2017-18	Upper Limit	Lower Limit
Under 12 months	25%	0%
1 year - 2 years	40%	0%
2 years within 5 years	60%	0%
5 years within 10 years	80%	0%
10 years and above	100%	0%

Maturity Structure of variable rate borrowing during 2017-18	Upper Limit	Lower Limit
Under 12 months	35%	0%
1 year - 2 years	40%	0%
2 years within 5 years	60%	0%
5 years within 10 years	80%	0%
10 years and above	100%	0%

Investments for periods longer than 365 days

These limits are set with regard to the Council's liquidity requirements and to reduce the need for early sale of an investment, and are based on the availability of funds after each year-end.

The Council is asked to approve the treasury indicator: -

Maximum principal sums invested which can be held for over 365 days	2018-19 £m	2019-20 £m	2020-21 £m
Principal sums invested > 365 days	£120m	£120m	£120m

Supplementary Indicator - Internal Borrowing

The following (new) indicator identifies the estimated level of internal borrowing, i.e. the extent to which internal / investment balances are being used in lieu of borrowing externally (to fund the CFR, or overall need to borrow).

Internal Borrowing	2018-19	2019-20	2020-21
Estimated % of CFR (exc. PFI) funded from internal borrowing	15.4%	12.9%	12.2%

Please note, the above indicator is not specifying a limit. It simply identifies, for information purposes, the assumed internal borrowing position that has been used in calculating the revenue budget implications for the Council's treasury management activity.

The indicator identifies the interest rate risk exposure on this element of the borrowing need / requirement; i.e. beyond that attributable to actual external borrowing. The greater the percentage, the higher the potential risk.

The following table identifies the notional additional cost should the above internal borrowing need to be externalised – i.e. replaced with actual external loans:

Internal Borrowing – Notional Replacement Cost	2018-19 £m	2019-20 £m	2020-21 £m
Notional cost of externalising internal borrowing	£3.418m	£3.260m	£2.898m

Note the above (notional) cost is based the estimated average external borrowing rate for each year. Again, the above indicator is not specifying a limit. It is simply for information purposes
