

Northumberland

County Council

AUDIT COMMITTEE

25 JANUARY 2023

TREASURY MANAGEMENT STRATEGY STATEMENT FOR THE FINANCIAL YEAR 2023-24

Report of Jan Willis, Interim Executive Director of Finance and Section 151 Officer

Cabinet Member: Councillor Richard Wearmouth – Deputy Leader and Portfolio Holder for Corporate Services

Purpose of Report

The Local Government Act 2003 requires the Council to set out its Treasury Strategy for borrowing and to prepare an Annual Investment Strategy, which sets out the policies for managing investments and for giving priority to the security and liquidity of those investments. The Council nominates the Audit Committee to be responsible for ensuring effective scrutiny of the Treasury Management Strategy and Policy.

This report sets out the Treasury Management Strategy, Treasury Management Policy Statement, the Annual Investment Strategy for the Financial Year 2023-24, Prudential Indicators 2023-24 to 2026-27 and the Minimum Revenue Provision Policy 2023-24.

Recommendations

- Members consider the report and recommend that County Council approves the Treasury Management Strategy Statement, including new reporting requirements, the Treasury Management Policy Statement, the Annual Investment Strategy, and the Borrowing Strategy for the Financial Year 2023-24.
- Members recommend that County Council approves the Prudential Indicators (Appendix 4) for four years 2023-24 to 2026-27 to ensure that the Council's capital investment plans are affordable, prudent and sustainable.
- Members recommend that County Council approves the Minimum Revenue Provision Policy (Appendix 5) 2023-24.

Link to Corporate Plan

This report is aligned to the priorities outlined in the Corporate Plan 2021-24 “A Council that Works for Everyone”.

Key issues

The Local Government Act 2003 (the Act) and supporting regulations requires the Council to ‘have regard to’ the Chartered Institute of Public Finance and Accountancy (CIPFA) Prudential Code and the CIPFA Treasury Management Code of Practice (which were adopted by Northumberland County Council in February 2010), to set Prudential and Treasury Indicators for the next four years to ensure that the Council’s capital investment plans are affordable, prudent and sustainable.

The Act requires the Council to set out its treasury strategy for borrowing and to prepare an Annual Investment Strategy (as required by Investment Guidance issued subsequent to the Act).

CIPFA published revised Treasury Management and Prudential Codes on 20 December 2021 which included revisions to the reporting framework from the 2023-24 financial year. Details of these changes are covered in section 1.2 of the report.

The Treasury Management Strategy Statement details the proposed activities of the Treasury Management function for the financial year 2023-24 and is based upon the treasury management officers’ views on interest rates, supplemented with leading market forecasts provided by the Council’s treasury management advisors, Link Asset Services.

TREASURY MANAGEMENT STRATEGY STATEMENT 2023-24

1. INTRODUCTION

1.1. Background

This Treasury Management Strategy Statement details the expected activities of the Treasury Management function for the financial year 2023-24. Its production and submission to full Council is a requirement of the CIPFA Code of Practice on Treasury Management.

Part of the treasury management operation is to ensure that cash flow is adequately planned, with cash being available when it is needed. Surplus monies are invested in low/medium risk counterparties or instruments commensurate with the Council's risk appetite, providing adequate liquidity initially before considering investment return.

The second main function of the treasury management service is the funding of the Council's capital plans. These capital plans provide a guide to the borrowing need of the Council; essentially the longer-term cash flow planning, to ensure that the Council can meet its capital spending obligations. This management of longer-term cash may involve arranging long or short-term loans or using longer-term cash flow surpluses. On occasion, when it is prudent and economic, any debt previously drawn may be restructured to meet Council risk or cost objectives.

The contribution the treasury management function makes to the authority is critical, as the balance of debt and investment operations ensure liquidity or the ability to meet spending commitments as they fall due, either on day-to-day revenue expenditure or for larger capital projects. The financial cost of these activities - i.e. the balance between the interest cost of debt and the investment income arising from cash deposits - has a significant impact on the overall revenue budget. In addition, since cash balances are mostly generated from reserves and balances, it is paramount to ensure adequate security of the sums invested, as a loss of principal will result in a loss to the General Fund Balance.

Whilst any commercial initiatives or loans to third parties will impact on the treasury function, these activities are generally classed as non-treasury activities, (arising usually from capital expenditure), and are separate from the day-to-day treasury management activities.

CIPFA defines treasury management as:

“The management of the local authority's borrowing, investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.”

1.2. Statutory and Regulatory Requirements

The Local Government Act 2003 (the Act) and supporting Regulations requires the Council to 'have regard to' the Chartered Institute of Public Finance and Accountancy's (CIPFA) Prudential Code 2021, and the CIPFA Treasury Management in the Public Services Code of Practice and Cross-Sectoral Guidance Notes 2021.

The codes define the manner in which capital spending plans are to be considered and approved. They require the Council to set Prudential Indicators for the next three years to ensure that the Council's capital investment plans are affordable, prudent and sustainable. In conjunction with this, they also require the Council to set out its Treasury Strategy for borrowing and to prepare an Annual Investment Strategy, as required by the (revised) Investment Guidance issued by the former Ministry of Housing, Communities and Local Government (MHCLG) which came into effect 1 April 2018.

With effect from 2019-20 there was a requirement that the report included a Capital Strategy, to provide a longer-term focus to the capital plans, and an extension of the meaning of 'investments' to include both financial and non-financial investments or commercial activity undertaken under the Localism Act 2011. The Capital Strategy is reported to County Council for approval with the annual budget report and Medium-Term Financial Plan in February each year.

2021 revised CIPFA Treasury Management Code and Prudential Code – changes which will impact on future Treasury Management Strategy Statement and Annual Investment Strategy reports and the risk management framework

CIPFA published revised Treasury Management and Prudential Codes on 20th December 2021 which included revisions to the reporting framework from the 2023-24 financial year.

The revised Treasury Management Code requires all investments and investment income to be attributed to one of the following three purposes:

a) Treasury Management

Arising from the organisation's cash flows or treasury risk management activity, this type of investment represents balances which are only held until the cash is required for use.

b) Service Delivery

Investments held primarily and directly for the delivery of public services including housing, regeneration and local infrastructure. Returns on this category of investment which are funded by borrowing are permitted only in cases where the income is "either related to the financial viability of the project in question or otherwise incidental to the primary purpose".

NCC Context: This covers the shares held in Newcastle Airport and Advance Northumberland, along with the loans provided to Advance Northumberland, the North East Local Enterprise Partnership (NELEP) and other third parties.

c) Commercial Return

Investments held primarily for financial return with no treasury management or direct service provision purpose. Risks on such investments should be proportionate to an authority's financial capacity – i.e., that 'plausible losses' could be absorbed in budgets or reserves without unmanageable detriment to local services. An authority must not borrow to invest primarily for financial return.

NCC Context: The Council does not have any investments in this category.

The revised Treasury Management Code also requires authorities to implement the following:

- Adopt a new liability benchmark treasury indicator to support the financing risk management of the capital financing requirement; this is to be shown in chart form for a minimum of ten years, with material differences between the liability benchmark and actual loans to be explained;

NCC Context: This indicator was adopted by NCC in 2022-23, following the publication of the draft proposals.

- Long-term treasury investments, (including pooled funds), are to be classed as commercial investments unless justified by a cash flow business case;

NCC Context: The Council currently does not have any long-term investments.

- Pooled funds are to be included in the indicator for principal sums maturing in years beyond the initial budget year;

NCC Context: The Council currently does not have any pooled funds / investments.

- Reporting to members is to be done quarterly. Specifically, the Chief Finance Officer (CFO) is required to establish procedures to monitor and report performance against all forward-looking prudential indicators at least quarterly. The CFO is expected to establish a measurement and reporting process that highlights significant actual or forecast deviations from the approved indicators. However, monitoring of prudential indicators, including forecast debt and investments, is not required to be taken to Full Council and should be reported as part of the authority's integrated revenue, capital and balance sheet monitoring;

NCC Context: Going forward, quarterly reports will be provided to Cabinet as part of the revenue and capital budget monitoring, in addition to the existing Treasury Management Strategy Statement, Mid-Year Review and Final Outturn reports to Audit Committee.

- Environmental, Social and Governance (ESG) issues to be addressed within an authority's treasury management policies and practices (TMP1).

NCC Context: This is a developing area, the Code states that it is not implied that it currently needs to include ESG scoring or other real-time ESG criteria at individual investment level. Moving forward, the Council will look to work with its treasury management advisor to establish a consistent approach to ESG monitoring across the various investments.

Treasury management investments represent the placement of cash in relation to the s12 Local Government Act 2003 Act investment powers: namely residual cash resulting from the authority's day to day activities.

Service delivery or non-treasury investments tend to relate to s1 expenditure powers under the Act and in the Council's case relate to policy type investments, whereby capital or revenue cash is advanced for a specific Council objective. This may be an advance to a third party for economic regeneration, or to enable care facilities etc.

This report deals solely with financial investments. Non-financial investments, which from the Council's perspective relate to the loans provided to third parties, are covered in the Capital Strategy report. However, paragraph 5.8 does provide a summary of the Council's "service delivery investments" or non-treasury managements investments.

1.3. Basis and Content of Treasury Management Strategy for 2023-24

The proposed strategy for 2023-24 in respect of the following aspects of the treasury management function is based upon officers' views on interest rates, supplemented by leading market forecasts provided by the Council's treasury advisors, Link Asset Services. The strategy covers:

- Current portfolio position.
- Economic outlook and prospects for interest rates.
- Borrowing Strategy for 2023-24.
- Annual Investment Strategy for 2023-24.
- Housing Revenue Account (HRA) treasury costs.
- Treasury management limits and Prudential Indicators.
- Minimum Revenue Provision Policy Statement.
- Policy on use of external service providers; and,
- Implementation of the Treasury Management Strategy, scheme of delegation, reporting and training requirements.

1.4. Balanced Budget Requirement

It is a statutory requirement under Section 33 of the Local Government Finance Act 1992, revised under Section 31 of the Localism Bill 2011, for the Council to produce a

balanced budget. In particular, Section 31 requires a local authority to calculate its budget requirement for each financial year to include the revenue costs that flow from capital financing decisions. This means that the impact of increases in capital expenditure, such as interest charges associated with any new borrowing, and any increases in running costs from these capital projects, must be limited to a level which is affordable within the projected income of the Council for the foreseeable future.

The Council also has a statutory duty under S.3 of the Local Government Act 2003, and supporting regulations, to determine and keep under review how much it can afford to borrow. The amount so determined is termed the "Affordable Borrowing Limit". The Council must have regard to the Prudential Code when setting its Affordable Borrowing Limit, which essentially requires it to ensure that total capital investment remains within sustainable limits.

The Council acknowledges that effective treasury management will provide support towards the achievement of its business and service objectives. It is therefore committed to the principle of achieving best value in treasury management within the context of effective risk management, and to employing suitable performance measurement techniques, for example comparison with other members of the CIPFA and Link benchmarking clubs.

2. THE PORTFOLIO POSITION AT 30 NOVEMBER 2022

2.1. Current Borrowing

The Council's borrowing at 30 November 2022 is shown below:

	General Fund £m	HRA £m	Total Principal 30 Nov 2022 £m	Weighted Average Rate %
Public Works Loan Board Loans	409.560	40.204	449.764	2.65
LOBOs	153.500	23.000	176.500	3.95
Market / Local Authority (>1 year)*	111.000	8.100	119.100	2.80
Salix	0.037	-	0.037	-
Short Term loans* (<1 year)	-	-	-	-
TOTAL EXTERNAL BORROWING	674.097	71.304	745.401	2.98

* Note: above figures are based on the term of loans at their inception

Total external borrowing has decreased by £11.529 million from £756.930 million at the start of year to £745.401 million at 30 November 2022. Following further repayments of £40.023 million and £40.000 million new borrowing scheduled for February and March 2023, the year-end figure is expected to be around £745.378 million.

2.2. Current Investments

The table below summarises the investment position at 30 November 2022:

	Total Principal 30 Nov 2022 £m	Weighted Average Rate %
Money Market Funds and Call Accounts	76.850	2.99
Fixed Term Investments – Short Term (<1 year)*	75.000	2.64
Fixed Term Investments – Long Term (>1 year)*	10.000	3.12
TOTAL EXTERNAL INVESTMENTS	161.850	2.83

* Note: above figures are based on the term of investments at their inception

3. FORECAST FOR INTEREST RATES AND ECONOMIC OUTLOOK

The Council has appointed Link Asset Services (Link) as its treasury advisor and part of its service is to assist the Council to formulate a view on interest rates. The following table gives Link's central view of rates for 2023-24 (at 8 November 2022). A longer view and more detailed forecast are included at Appendix 1.

	Quarter 1 (Q/E Jun 2023)	Quarter 2 (Q/E Sep 2023)	Quarter 3 (Q/E Dec 2023)	Quarter 4 (Q/E Mar 2024)
Bank Rate	4.50%	4.50%	4.50%	4.00%
5-year PWLB	4.20%	4.10%	4.00%	3.90%
10-year PWLB	4.40%	4.30%	4.20%	4.00%
25-year PWLB	4.60%	4.50%	4.40%	4.30%
50-year PWLB	4.30%	4.20%	4.10%	4.00%

3.1. Economic Outlook (early December 2022)

Link's central forecast reflects a view that the Bank of England's Monetary Policy Committee (MPC) will be keen to demonstrate its anti-inflation credentials by delivering a succession of rate increases. This has happened throughout 2022, but the new Government's policy of emphasising fiscal rectitude will probably mean Bank Rate does not now need to increase to further than 4.50%.

Further down the road, it is anticipated the Bank of England will be keen to loosen monetary policy when the worst of the inflationary pressures have lessened – but that timing will be one of fine judgement: cut too soon, and inflationary pressures may well build up further; cut too late and any downturn or recession may be prolonged.

The Consumer Price Index (CPI) measure of inflation will peak at close to 11.00% in Q4 2022. Despite the cost-of-living squeeze that is still taking shape, the Bank will want to see evidence that wages are not spiralling upwards in what is evidently a very tight labour market. Wage increases, excluding bonuses, are currently running at 5.70%. With further increases in the gas and electricity price caps pencilled in for April 2023, and the cap potentially rising from an average of £2,500 to £3,000 per household, there is still a possibility that inflation will spike higher again before dropping back slowly through 2023.

Regarding the plan to sell £10 billion of gilts back into the market each quarter (Quantitative Tightening), this has started but will focus on the short to medium end of the curve for the present. This approach will prevent any further disruption to the longer end of the curve following on from the short-lived effects of the Truss/Kwarteng unfunded dash for growth policy.

In the upcoming months, forecasts will be guided not only by economic data releases and clarifications from the MPC over its monetary policies, and the Government over its fiscal policies, but the on-going conflict between Russia and Ukraine. More recently, the heightened tensions between China/Taiwan/US also have the potential to have a wider and negative economic impact.

In addition, the Bank's central message that Gross Domestic Product (GDP) will fall for eight quarters starting with Q3 2022 may prove to be a little pessimistic. Consumers are

still estimated to be sitting on over £160 billion of excess savings left over from the pandemic, which could cushion some of the impact of the above challenges; albeit these savings are held by more affluent people, whereas lower income families already spend nearly all their income on essentials such as food, energy and rent/mortgage payments. Ultimately, however, it will not only be inflation data but also employment data that will mostly impact the decision-making process, although any softening in the interest rate outlook in the US may also have an effect (just as, conversely, greater tightening may also).

3.2. Forecast for Treasury / Gilt Yields and PWLB Rates

Yield curve movements have become less volatile under the Sunak/Hunt government. Public Works Loans Board (PWLB) 5 to 50 years Certainty Rates are, generally, in the range of 3.75% to 4.50%. The medium to longer part of the yield curve is currently inverted (yields are lower at the longer end of the yield curve compared to the short to medium end).

Link's view is that the markets have, for the most part, already built in all the effects on gilt yields of the poor inflation outlook and likely increases in Bank Rate. However, markets are volatile and sudden opposing movements in gilt yields across the whole spectrum of the curve is possible.

3.3. Significant Risks to the Forecasts

Downside Risks

- Labour and supply shortages prove more enduring and disruptive and depress economic activity.
- The Bank of England acts too quickly, or too far, over the next two years to raise Bank Rate and causes UK economic growth, and increases in inflation, to be weaker than we currently anticipate.
- UK / EU trade arrangements – if there was a major impact on trade flows and financial services due to complications or lack of co-operation in sorting out significant remaining issues.
- Geopolitical risks, for example in Ukraine/Russia, China/Taiwan/US, Iran, North Korea and Middle Eastern countries, which could lead to increasing safe-haven flows.

Upside Risks

- The Bank of England is too slow in its pace and strength of increases in Bank Rate and, therefore, allows inflationary pressures to build up too strongly and for a longer period within the UK economy, which then necessitates an even more rapid series of increases in Bank Rate faster than we currently expect.
- The Government acts too slowly to increase taxes and/or cut expenditure to balance the public finances, in the light of the cost-of-living squeeze.

- The pound weakens because of a lack of confidence in the UK Government's fiscal policies, resulting in investors pricing in a risk premium for holding UK sovereign debt.
- Longer term US treasury yields rise strongly, if inflation numbers disappoint on the upside, and pull gilt yields up higher than currently forecast.

3.4. The Balance of Risks to the UK

The overall balance of risks to economic growth in the UK is to the downside. Indeed, the Bank of England projected two years of negative growth in their November Quarterly Monetary Policy Report.

4. THE BORROWING STRATEGY 2023-24

4.1. Introduction

The Council borrows to fund the Capital Programme, including loans to third parties for service / policy reasons (such as those to Advance Northumberland and Northumbria Healthcare NHS Foundation Trust etc.). The Council's capital expenditure plans are therefore the key driver of treasury management activity.

The output of capital expenditure plans is reflected in the Prudential Indicators, as set out in Appendix 4.

4.2. Borrowing Need – Capital Financing Requirement

The Council's long-term borrowing requirement is measured by the Capital Financing Requirement ("CFR"). The CFR represents total historic outstanding capital expenditure which has not yet been paid for from either revenue or cash-backed capital resources (such as grants and capital receipts). The CFR is repaid over time by an annual charge to revenue, known as the Minimum Revenue Provision (MRP). This charge, which is equivalent to depreciation, effectively spreads the cost of debt associated with capital expenditure over the useful economic life of the underlying assets.

At the same time the Council has significant levels of 'cash-backed' balances that are available for investment. Accordingly, the capital financing requirement (or borrowing requirement) need not always be met or funded externally from physical loans: At least in the short term, investment balances can be 'used' in lieu of borrowing externally; by withdrawing investments (in turn foregoing investment income) and instead using the cash to fund part of the borrowing requirement. This is often referred to as 'internal' or 'under' borrowing. Such an approach also has the added benefit of reducing 'counter-party' credit risk in terms of investments; because it reduces the need to place investments with external institutions.

The following tables summarise the forecast CFR movements for the next three financial years (based on the latest capital expenditure plans) along with the anticipated external borrowing over this period; assuming a significant degree on internal borrowing as proposed further below:

CFR Forecast (exc. PFI)	2023-24 £m	2024-25 £m	2025-26 £m	2026-27 £m
Opening CFR (exc. PFI)	1,040.808	1,111.193	1,170.101	1,207.618
Increase in CFR (exc. PFI)	70.385	58.908	37.517	(31.924)
Closing CFR (exc. PFI) [Need to Borrow]	1,111.193	1,170.101	1,207.618	1,175.694

External Borrowing Forecast (exc. PFI)	2023-24 £m	2024-25 £m	2025-26 £m	2026-27 £m
Opening External Borrowing (exc. PFI)	745.378	863.826	956.524	1,005.468
Increase / (Decrease) in External Borrowing (exc. PFI)	118.448	92.698	48.944	(31.061)
Closing in External Borrowing (exc. PFI)	863.826	956.524	1,005.468	974.407
Under / (Over) Borrowing	247.367	213.577	202.150	201.287

4.3. Proposed Borrowing Strategy

Given the current volatility in financial markets and the elevated interest rates that are forecast over the next year or two, it is proposed to maximise the use of internal / under borrowing (see paragraph 4.2 above) and keep any external borrowing to a minimum.

As identified in the above table, by the end of 2023-24, 22.26% (£247.367 million) of the Council's borrowing requirement is proposed to be covered by internal borrowing. The effective cost of this 'borrowing' is the foregone investment income. For 2023-24 this is estimated at 4.40% or around £11.942 million (based on the average mid-year internal borrowing position). Taking into consideration the forecast average cost for new external borrowing (i.e. average interest rate on actual loans) for 2023-24 of 4.49%, this equates to a notional saving of 0.49% or around £0.255 million (or alternatively the notional cost of externalisation).

Maintaining an under-borrowing position will minimise short term net revenue costs, but it is important to point out that this element of the borrowing requirement is subject to interest rate movements and therefore not without risk. Clearly if investment returns were to increase, or the borrowing had to instead be externalised (and funded by actual loans), the costs associated with this would increase accordingly. In order to identify and quantify this risk a local indicator is included in the Council's Prudential Indicators (see Appendix 4), identifying the level of internal borrowing and the impact of interest rate movements on this proportion of the borrowing requirement.

Despite utilising investments balances to support the borrowing need, as identified above a significant amount of external borrowing will still be required during 2023-24

(estimated at around £170.000 million, after taking into consideration maturing loans of £51.552 million) and going forward to fund the proposed Capital Programme.

Considering that interest rates are anticipated to remain high over the next year or two before gradually easing back to more normal levels, and the risks within the economic forecast, it is envisaged better value will generally be obtained at the shorter end of the interest rate curve. The external borrowing requirement is therefore expected to be met primarily from shorter term / temporary borrowing (up to 2 years); although medium to longer term borrowing may also be considered to provide a degree of longer-term certainty, if for example there was a sudden dip in rates.

The Section 151 Officer will continue to monitor the interest rate market and scrutinise all lending opportunities to ensure borrowing is taken at the most advantageous time and limit the risk of exposure to increased borrowing costs in the future.

In line with the scheme of delegation set out in the Treasury Management Practices (TMP's, section 10), The Section 151 Officer will continue to approve all borrowing.

4.4. Policy on borrowing in advance of need

While not expected to happen due to the internal/under borrowing policy, the Council does have flexibility to borrow funds this year for use in future years. Where there is a clear business case for doing so, borrowing may be undertaken to fund the approved Capital Programme or to fund future debt maturities. The Section 151 Officer may do this under delegated powers where, for instance, a sharp rise in interest rates is expected, and so borrowing early at fixed interest rates will be economically beneficial. Risks associated with any advance borrowing activity will be subject to appraisal in advance and subsequent reporting through the mid-year or annual reporting mechanism.

4.5. Debt Rescheduling

As short-term borrowing rates are forecast to be considerably cheaper than longer term fixed interest rates, there may be potential opportunities to generate savings by switching from long term debt to short term debt. However, these savings will need to be considered in the light of the current treasury position and the size of the cost of debt repayment and in particular the premiums incurred.

The reasons for any rescheduling to take place will include:

- the generation of cash savings and / or discounted cash flow savings,
- helping to fulfil the treasury strategy; and,
- enhance the balance of the portfolio (amend the maturity profile and/or the balance of volatility).

The Council will monitor the situation and seek advice from Link Asset Services before any rescheduling of debt. All rescheduling will be reported to the Council as part of the in-year treasury management updates.

4.6. UK Municipal Bond Agency and European Investment Bank

The UK Municipal Bond Agency may be in a position to offer loans to local authorities, perhaps at rates lower than those offered by the PWLB. Consideration may therefore be given to making use of this new source of borrowing as and when appropriate.

Consideration will also be given to borrowing from the European Investment Bank (EIB), where rates can be forward fixed, if this represents better value of money.

4.7. Compliance with Prudential Code – Borrowing

The Prudential Code 2021 specifies that it is not prudent for local authorities to make any investment or spending decision that will increase the Capital Financing Requirement, and so may lead to new borrowing, unless directly and primarily related to the functions of the authority and where any financial returns are either related to the financial viability of the project in question or otherwise incidental to the primary purpose.

The Section 151 Officer confirms that any new borrowing directly and primarily in relation to the functions of the Council, and no borrowing will be taken to invest primarily for financial return.

5. ANNUAL INVESTMENT STRATEGY 2023-24

5.1. Introduction – Investment Policy

The Council has significant levels of ‘cash-backed’ balances that are available for investment, in the form of General Fund and HRA balances, and the numerous earmarked reserves and provisions.

5.2. Investment Returns Expectations

As outlined in section 3 above and Appendix 1, investment returns are expected to improve in 2023-24. Link Asset Services first forecast an increase in Bank Rate in December 2021. However, while markets are pricing in a series of Bank Rate hikes, actual economic circumstances may see the MPC fall short of these elevated expectations.

Against this background, Link Asset Services suggested budgeted investment earnings rates for returns on investments placed for periods up to about three months during each financial year are as follows:

	2023-24	2024-25	2025-26	2026-27	2027-28
Budgeted Rate	4.40%	3.30%	2.60%	2.50%	2.80%

5.3. Investment Strategy

As proposed in section 4 above, it is expected that during 2023-24 a significant proportion of available investment balances will be used as ‘internal borrowing’ to

support the financing of the CFR. As a result, external investments will be limited and may decrease further during the year.

All remaining funds will be invested in-line with the following Investment Policy, which has regard to the former MHCLG's Guidance on Local Government Investments ("the Guidance") and the revised CIPFA Treasury Management in Public Services Code of Practice and Cross Sectoral Guidance Notes ("the CIPFA TM Code").

Investments will be made whilst considering the core balance and cash flow requirements and the outlook for short-term interest rates (i.e. rates for investments up to 12 months). Greater returns are usually obtainable by investing for longer periods. The current shape of the yield curve suggests that is the case at present, but there is the prospect of Bank Rate peaking in the first half of 2023 and possibly reducing as early as the latter part of 2023 so an agile investment strategy would be appropriate to optimise returns.

Accordingly, while most cash balances are required in order to manage cash flow volatility; where surplus cash sums can be identified, longer term investments will be considered where there is value.

The overall aim of the Investment Strategy is to provide security of capital and minimise risk while ensuring the Council has sufficient liquidity.

The Council will also aim to achieve the optimum return on its investments commensurate with desired levels of security and liquidity. The risk appetite of the Council is low/medium, therefore specified and unspecified investments (see below) will be considered. However, security and liquidity will continue to take precedence over yield. All investments will be placed only with organisations which meet the criteria and will always be scrutinised and approved in line with approved Treasury Management Practices (Appendix 3).

5.4. Investment objectives

The general policy objective for this Council is the prudent investment of its surplus cash balances, which includes monies borrowed for the purpose of expenditure in the reasonably near future (i.e. over the 4-year medium term planning cycle). The Council's investment priorities are:

- the security of capital,
- the liquidity of its investments; and,
- the achievement of optimum yield.

Security and liquidity of principal have always been the priority and will continue to be so. In CIPFA's view "The priority is to protect capital rather than maximise return. However, the avoidance of all risk is neither appropriate nor possible and a balance must be struck with a keen responsibility for public money." In times of budget constraints, making the Council's funds work and generating increased returns is

becoming increasingly important. CIPFA encourages local authorities to look carefully at their Counterparty Lists to ensure return on investments is achieved.

CIPFA recommends that “Responsibility for local authorities investment decisions lies and must continue to lie with the local authorities themselves”. The best authorities:

- explicitly balance risk and reward,
- review and scrutinise policies and procedures regularly,
- have well trained staff and engaged elected members; and,
- use a wide variety of information.

The Credit and Counterparty Criteria List (Appendix 2), which has not changed from last year, offers diverse counterparties and takes into account country, sector and group limits.

This list clearly sets out the minimum acceptable credit criteria for organisations with which the Council will place funds.

All investments will be placed only with organisations which meet the criteria and will always be scrutinised and approved in line with approved Treasury Management Practices (Appendix 3).

The borrowing of monies purely to invest or lend-on and make a return is unlawful and this Council will not engage in such activity.

5.5. Security of Capital and Creditworthiness (Credit and Counterparty Policy)

In accordance with the above guidance from the former MHCLG and CIPFA, and in order to minimise the risk to investments, the Council applies minimum acceptable credit criteria when determining which organisations it can place investments with. The criteria are set out in Credit and Counterparty Policy which is attached at Appendix 2.

The Council regards a key objective of its treasury management activities to be the security of the principal sums it invests. Accordingly, it will ensure that its counterparty policy and limits reflect a prudent attitude towards organisations with which funds may be deposited.

The Council applies the creditworthiness service provided by Link Asset Services. This service employs a sophisticated modelling approach utilising credit ratings from Fitch and Moody’s. The credit ratings of counterparties are supplemented with the following overlays:

- credit watches and credit outlooks from credit rating agencies,
- CDS* spreads to give early warning of likely changes in credit ratings; and,
- sovereign ratings to select counterparties from only the most creditworthy countries.

*Credit default swaps (CDS) are a type of insurance against default risk by a particular company/financial institution. In the event of a default, the buyer receives the face value of the bond or loan from the insurer.

The Council is alerted daily of changes to ratings of both agencies. If a downgrade results in the counterparty no longer meeting the Council's minimum criteria, no new investment will be made. Consideration will also be given to whether or not existing investments will be withdrawn, which is dependent on whether the bank concerned is agreeable.

As with previous practice, ratings and the use of this external service will not be the sole determinant of the quality of an institution. It is important to continually assess and monitor the financial sector on both a micro and macro basis and in relation to the economic and political environments in which institutions operate. In addition, the Council will also use market data and market information, information on government support for banks and the credit ratings of that government support.

The assessment will also take account of information that reflects the opinion of the markets. Other information sources used will include the financial press, share price and other such information pertaining to the banking sector in order to establish the most robust scrutiny process on the suitability of potential investment counterparties.

5.6. Types of investments the Council may use

The Council may use various financial instruments for the prudent management of its treasury balances (as listed in the Credit and Counterparty Policy in Appendix 2).

The Credit and Counterparty Policy does not identify individual counterparty names in order to ensure that the Section 151 Officer has the flexibility to place investments with the most suitable organisations, which meet the agreed criteria, in a timely manner.

Treasury staff investigate various products and instruments as they become available to see if they meet the Council's investment priorities and criteria list.

In line with the former MHCLG Guidance, the Credit and Counterparty Policy categorises investments instruments between 'Specified' and 'Non-Specified' investments:

Specified Investments offer high security and high liquidity. All such investments are:

- in pounds sterling,
- due to be repaid within 12 months or which may be required to be repaid within 12 months,
- not capital expenditure,
- made with high credit quality organisations, (for the purpose of this strategy high credit ratings are "A-" and above for long term and "F2/P-2" and above for short term investments); or,

- made with the United Kingdom Government or local authority (including the North East Combined Authority), parish council or community council.

Non-Specified Investments are those which do not meet the criteria for specified investments and give greater potential risk. The former MHCLG does not discourage the use of non-specified investments but states that there is a need for these to be dealt with in more detail.

As in previous years, it is anticipated that the majority of investments will be specified but it is proposed to maintain a maximum of 25% of total Council investments being held in non-specified investments at any one time during the year. This is primarily to allow the use of large, non-rated, building societies as well investments beyond 1 year with other local authorities.

Investments will only be placed with organisations which meet the criteria set out in the approved Credit and Counterparty Policy. Individual investments or aggregate of investments to one organisation should comply with the monetary limits set out in Credit and Counterparty Criteria List.

Nationalised/part-nationalised banks in the UK have credit ratings which do not comply with the credit criteria used by the Council. However, due to significant Government ownership the Council feels more comfortable applying higher limits for investments.

Investments are to be arranged in line with Treasury Management Practices (Appendix 3) and all investments with new counterparties must be approved by the Section 151 Officer or the Deputy Section 151 Officer or in their absence the Finance Managers. There is currently no proposed change to this practice.

5.7. Forecast Investment Balances and Liquidity

Based on current reserves and balances forecast and allowing for the proposed strategy of using some of the investable balances as 'internal borrowing' to support the financing of the CFR (see Section 4), it is anticipated that in 2023-24 the Council's external investment balances will fluctuate throughout the year within a range between £39.674 million and £114.217 million.

To ensure liquidity a minimum of 20.00% of overall investments, or £5.000 million, whichever is lower, will be held in liquid accounts. For cash flow generated balances, the Council will seek to utilise its money market funds, call accounts and short-dated deposits (overnight to six months).

As investment rates are forecast to remain below borrowing rates, and there is a requirement for liquid funds to support the under-borrowing position, it is envisaged the Council will generally avoid locking into longer term deals. However, if exceptionally attractive rates are available then they will be considered. Close contact will be maintained with the money market to ascertain the most favourable interest rates on offer to achieve best value from the return on surplus monies available in line with the Counterparty Policy in Appendix 2.

Investments will be made with reference to the core balance and cash flow requirements and the outlook for short-term interest rates.

5.8. Service Delivery / Non-Treasury Management Investments Defined as Capital Expenditure

In addition to the above standard treasury management activity, the Council also receives interest from two other 'service delivery' / 'non-treasury' activities; namely the investment shares NIAL Holdings (Newcastle Airport) [valued at £13.490 million as 31 March 2022], Advance Northumberland [£4.338 million], Northumberland Enterprise Holdings Ltd [£0.300 million], and the loans to Newcastle Airport, Northumbria Healthcare NHS Foundation Trust, Advance Northumberland and other organisations.

These non-core treasury activities are deemed by Statutory Regulations as capital expenditure and are provided to support Council service objectives and corporate priorities. They are not made or regarded as part of the 'core' treasury management activity - i.e. the investment of surplus cash flow balances, as made under the power to invest inferred by s12 of the Local Government Act 2003. As a result, these activities were previously outside of the scope of the Investment Strategy.

CIPFA's Treasury Management Code's definition of 'Investments' covers all the financial assets of the organisation, as well as other non-financial assets that the organisation holds primarily for financial returns, such as commercial property portfolios. Similarly, the former MHCLG's investment guidance recommends that these non-financial or non-core investments should be included within the Annual Investment Strategy.

Whilst it is entirely appropriate to highlight the scope of these activities, there is a view amongst some practitioners that it may be misleading to refer to items of expenditure in the context of an investment strategy, and that a more suitable mechanism to explain and cover these activities would be within the newly re-introduced Capital Strategy.

Due to their nature, it is difficult to assess and consider non-financial or non-core investments in the context of liquidity and security, which arguably does not apply to these activities, at least not in the same way as it does for standard cash investments. Beyond the terms of the underlying agreement, loans to third parties are not liquid and have no need to be. The expenditure is incurred in the support of service objectives and funded from capital resources, which is different to the requirements and policies surrounding management of the Council's investments and cash flows. Similarly, whilst the return of the funds advanced is key, security for third party loans may need to be considered differently to the credit ratings modelling approach utilised for core-treasury investments.

For these reasons, the Council's policy on non-financial or non-core investments, specifically the loans to third parties, is covered separately within the Capital Strategy document which is considered and approved by Council at its budget setting meeting in February and is attached at Appendix 6 for information.

A summary of value of loans to third parties and the interest expected to be received is shown below:

Borrower	Estimated Balance at 1 Apr 2023 £m	Weighted Average Interest Rate	Forecast Interest Income 2023-24* £m
Northumbria Healthcare NHS Foundation Trust	89.588	3.57%	2.458
Advance Northumberland Group	274.569	5.67%	14.214
Newcastle Airport	11.916	8.60%	-
North East Local Enterprise Partnership	10.507	3.34%	0.437
Northumberland College	5.767	4.14%	0.258
Northumberland Aged Miners	1.382	3.50%	0.048
Cramlington Town Council	0.291	4.00%	0.012
Active Northumberland	0.156	3.25%	0.005
Newcastle City Council	0.171	5.00%	0.009
Alnwick Juniors	0.152	0.00%	-
Arts Groups (The Maltings, Alnwick Playhouse)	0.062	3.87%	0.002
Calvert Trust	0.086	2.10%	0.002
Alnwick Youth Hostel	0.139	2.10%	0.004
Haltwhistle Pool	0.044	2.10%	0.001
Northumberland Community Bank	0.050	2.54%	0.001
Other Parish/Town Councils and Housing Associations	0.064	14.12%	0.008
Alexa's Animal Charity	0.118	2.40%	0.003
Total	395.062	5.18%	17.462

*Note: the above includes forecast advances to be made.

**No interest payments are due from Newcastle International Airport in 2023-24.

The Medium-Term Capital Programme for 2023-24 to 2026-27 includes a provision of £18.895 million for further loans to Advance Northumberland and other third parties, plus an additional £0.519 million for loans to the North East Local Enterprise Partnership in respect of Enterprise Zone investments (which will ultimately be repaid by future business rate income).

Whilst the income from these advances is significant, the intention is largely only to cover the associated underlying borrowing costs to the Council. The loans are

considered and approved to support the Council's service and policy objectives not to generate a financial return for the Council.

5.9. Provision for credit related losses

If any of the Council's investments appear at risk of loss due to default (i.e. a credit-related loss, and not one resulting from a fall in price due to movements in interest rates) the Council will make revenue provision of an appropriate amount.

6. HOUSING REVENUE ACCOUNT (HRA) TREASURY MANAGEMENT COSTS

6.1. Overview

Following implementation of the HRA self-financing reforms in April 2012, a separate pool of specific loans is now maintained for the HRA. The interest costs associated with these loans are charged direct to the HRA. This arguably negates the need for the former HRA Item 8 charge, which allocated a share of the Authority's overall borrowing costs to the HRA.

For the most part, the HRA will aim to ensure that new loans are taken out (or repaid) to match any anticipated movement in its borrowing requirement - known as the HRA Capital Financing Requirement (HRA CFR). There will however be instances during the year when the balance of the HRA loan pool - i.e. actual external borrowing charged to the HRA does not equate exactly to the HRA CFR. In such circumstances the HRA is borrowing from (or lending to) the General Fund and an additional charge (or credit) is necessary in order to reflect the notional cost of this imbalance. The Council's proposed policy for this arrangement is as follows, the policy remains unchanged from the previous year:

6.2. Policy for HRA Under and Over Borrowing

HRA Under-Borrowing

Where the weighted average balance of the HRA (external) loans pool is less than the weighted average HRA CFR for the same period, notional interest will be charged to the HRA at the average rate of interest for 30-year PWLB borrowing for the period.

HRA Over-Borrowing

Where the weighted average balance of the HRA (external) loans pool is greater than the weighted average HRA CFR for the same period, notional interest will be paid to the HRA at the average 3-month SONIA (Sterling Overnight Index Average) rate for the period.

6.3. Other Treasury Management Charges to HRA

As under the former Item 8 arrangements, the HRA will continue to receive interest (or investment income) on its weighted average balances for the year, based on the Council's overall average investment rate.

The HRA will also continue to be charged a proportion of the authority's overall debt management expenses (based on the CFR proportions), as well its share of any historic premiums or discounts associated with the premature repayment of borrowing. Any future/new premiums or discounts will be met fully by the relevant fund of the underlying loan – i.e. premiums or discounts related to loans within the HRA loan pool will be charged fully to the HRA, and vice versa.

7. PRUDENTIAL INDICATORS and TREASURY LIMITS 2023-24 to 2026-27

The Council's capital expenditure plans are the key driver for treasury management activity. The output of the capital expenditure plans is reflected in the prudential indicators, which are designed to assist members to overview and confirm capital expenditure plans.

Councils are required to approve a set of Prudential Indicators for the new financial year and adhere to these indicators during the course of that year. The indicators are to be set on a rolling basis, for the forthcoming financial year and three successive financial years. Prudential Indicators for 2023-24 to 2026-27 are set out in Appendix 4.

8. THE ANNUAL MINIMUM REVENUE PROVISION POLICY STATEMENT

The Council is required to pay off an element of the accumulated General Fund capital spend each year (the CFR) through a revenue charge (the minimum revenue provision (MRP)), although it is also allowed to make additional voluntary payments if required.

Former MHCLG Regulations have been issued which requires Full Council to approve an MRP policy in advance of each year. A variety of options are provided to councils, with an overarching requirement there is a prudent provision.

Former MHCLG revised their MRP guidance in 2018. However, none of the amendments impact on the Council's current or proposed policy.

The 2023-24 policy is unchanged from that approved for 2022-23.

The Council is recommended to approve the Annual Minimum Revenue Provision Policy Statement including Additional Voluntary Provision as detailed within Appendix 5.

9. POLICY ON USE OF EXTERNAL SERVICE PROVIDERS

The Council recognises that responsibility for treasury management decisions remains with the organisation at all times and will ensure that undue reliance is not placed upon the services of its external service providers. All decisions will be undertaken with regard to all available information, including, but not solely, the Council's treasury advisers.

It also recognises that there is value in employing external providers of treasury management services in order to acquire access to specialist skills and resources. The Council will ensure that the terms of the appointment and the methods by which their value will be assessed are properly agreed and documented, and subject to regular review.

The Council uses Link Asset Services Ltd as its treasury management consultant. The company provides a range of services which include:

- Technical support on treasury matters, capital finance issues and templates of Member reports.
- Economic and interest rate analysis.
- Debt services which include advice on the timing of borrowing.
- Debt rescheduling advice surrounding the existing portfolio.
- Generic investment advice on interest rates, timing and investment instruments; and,
- Online up to date credit ratings.

10. IMPLEMENTATION OF THE TREASURY MANAGEMENT STRATEGY, SCHEME OF DELEGATION, TRAINING AND REPORTING REQUIREMENTS

10.1. Implementation of the Treasury Management Strategy

The continued implementation of the above strategy and procedures is the responsibility of the Section 151 Officer, who is authorised to arrange the necessary borrowings within the limits set out in the Prudential Indicators, and necessary investments as set out in the investment strategy.

Northumberland County Council delegates responsibility for the implementation and regular monitoring of its treasury management policies and practices to Cabinet.

The Council nominates Audit Committee to be responsible for ensuring effective scrutiny of the Treasury Management Strategy and policies.

There are no proposed changes to this methodology.

10.2. Treasury Management Practices (TMPs)

Treasury Management Practices (Appendix 3) set out the manner in which the Council will seek to achieve the treasury management policies and objectives. The Council has adopted the recommended form of words defining the Council’s treasury management practices (TMPs), in compliance with CIPFA’s Treasury Management in the Public Services: Code of Practice and the Prudential Code for Capital Finance in Local Authorities. These set out the specific details of the systems to be employed and the records to be maintained.

These practices are as follows:

- TMP1 Risk Management
- TMP2 Best value and performance measurement
- TMP3 Decision-making and analysis
- TMP4 Approved instruments, methods and techniques

- TMP5 Organisation, clarity and segregation of responsibilities, and dealing arrangements
- TMP6 Reporting requirements and management information
- TMP7 Budgeting, accounting and audit arrangements
- TMP8 Cash and cash flow management
- TMP9 Money laundering
- TMP10 Training and qualifications
- TMP11 Use of external service providers; and,
- TMP12 Corporate governance.

The following minor changes have been made to the 2023-24 practices:

- references to the underlying codes of practice, which were revised for 2023-24;
- consideration of Environmental, Social and Governance (ESG) issues (TMP1);
- banking contract details (TMP1, para 1.2.3 and TMP11, para 11.1.1);
- Inflation and interest rate references (TMP1, para 1.5.1).
- Reference to the Principal Accountant post and its role within the treasury management function (TMP 5, para 5.4.6).

10.3. Responsible Officers

Daily treasury management activities will be undertaken by a Senior Accountant within the Corporate Finance team, as set out in TMP5. If they are absent a Principal Accountant within the Corporate Finance team will undertake these activities.

The three annual Treasury Management reports submitted to Audit Committee, and then Council, and quarterly updates submitted to Cabinet, will be produced by the Technical Accountant.

The Finance Manager will ensure all treasury management activities are made in accordance with agreed policies and practices.

10.4. Training

The CIPFA Code requires the responsible officer to ensure that Members with responsibility for treasury management receive adequate training in treasury management. This especially applies to Members responsible for scrutiny. Members received training in June 2022 and further training will be arranged as required.

The training needs of treasury management officers are periodically reviewed. Each officer concerned will receive appropriate training and guidance on their duties and the constraints within which they operate.

10.5. Reports and Monitoring

To ensure that those with ultimate responsibility for the treasury management function appreciate fully the implications of treasury management policies and activities, and that those implementing policies and executing transactions have properly fulfilled their responsibilities, reports need to be submitted to full Council which need to be reviewed by Cabinet.

The adequacy of the strategy statement will be monitored and reports requesting amendments to the statement will be produced when changes are thought to be necessary. The changes will be made in consultation with the Cabinet Portfolio holder for Corporate Services, whose role relates to the strategy and associated risks. Any strategy changes will be reported to the Audit Committee.

The Council is required to receive and approve three main reports each year, which incorporate a variety of policies, estimates and actuals. The following reports are required to be adequately scrutinised by Audit Committee before being recommended to the Council:

Treasury Management Strategy Statement

The first, and most important report covers:

- the capital plans (including prudential indicators),
- a Minimum Revenue Provision Policy (how residual capital expenditure is charged to revenue over time),
- the Treasury Management Strategy (how the investments and borrowings are to be organised) including treasury indicators; and,
- an investment strategy (the parameters on how investments are to be managed).

A Mid-Year Treasury Management Report

This will update members with the progress of the capital position, amending prudential indicators as necessary, and whether the treasury activity is meeting the strategy or whether any policies require revision.

An Annual Treasury Report

This provides details of prudential and treasury indicators and actual treasury operations compared to the estimates within the strategy.

Quarterly Reports (New Requirement from 2023-24)

In addition to the three major reports detailed above, from 2023-24 quarterly reporting is also required. These additional reports do not have to be reported to Full Council. Quarterly reports on the performance of the Council's treasury management activity will therefore be provided to Cabinet as part of the revenue and capital budget monitoring.

It is proposed that the Council follow reporting arrangements in accordance with the requirements of the revised Treasury Management Code of Practice.

Area of Responsibility	Council/ Committee/ Officer	Frequency
Scrutiny of treasury management strategy	Audit Committee or Risk Appraisal Panel	Annually before the start of the year
Treasury Management Strategy / Annual Investment Strategy / MRP policy and Treasury Management Practices	Cabinet / Full Council	Annually before the start of the year
Annual Treasury Outturn Report	Audit Committee / Full Council	Annually by 31 July to Audit Committee and 30 September to Full Council
Treasury Management Budget Monitoring Reports	Incorporated within the Budget Monitoring report and reported separately to Cabinet	Quarterly
Mid-Year Review Report	Audit Committee / Full Council	Annually by 30 November to Audit Committee and 31 January to Full Council
Updates or revisions to Treasury Management Strategy / Annual Investment Strategy / MRP policy	Audit Committee / Cabinet / Full Council	Ad- hoc

The policies and strategies set out in this document will ensure that the management and administration of treasury management will be robust, rigorous, disciplined and help minimise risk.

The procedures for monitoring treasury management activities through audit, scrutiny and inspection will be applied with an openness of access to information and provide well-defined arrangements for review and implementation of changes.

Implications

Policy	<p>The report sets out the Treasury Management Policy Statement for 2023-24 and is consistent with “A Council that Works for Everyone” priority included in the Council’s Corporate Plan 2021-24.</p>
Finance and value for money	<p>The financial implications of the 2023-24 investment and borrowing transactions have been taken into account within the revenue budget for 2023-24 and Medium-Term Financial Plan 2023-27.</p> <p>Northumberland County Council acknowledges that effective treasury management will provide support towards the achievement of its business and service objectives. It is therefore committed to the principles of achieving best value in treasury management within the context of effective risk management, and to employing suitable performance measurement techniques, for example comparison with other members of the CIPFA and Link benchmarking clubs.</p>
Legal	<p>The Local Government Act 2003 (the Act) and supporting regulations requires the Council to ‘have regard to’ the Chartered Institute of Public Finance and Accountancy (CIPFA) Prudential Code and the CIPFA Treasury Management Code of Practice 2021.</p>
Procurement	<p>There are no direct procurement implications for the County Council.</p>
Human Resources	<p>There are no direct staffing implications for the County Council.</p>
Property	<p>There are no direct property implications for the County Council.</p>
Equalities (Impact Assessment attached) Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>	<p>Not applicable.</p>

Risk Assessment	The report highlights the principal financial risks within the Treasury Management function. The identification, monitoring and control of risk are the prime criteria by which the effectiveness of the County Council's Treasury Management activities will be measured. Accordingly, the analysis and reporting of Treasury Management activities will focus on their risk implications for the Council. The investment priority is security and liquidity rather than yield, which is a secondary aim.
Crime & Disorder	There are no Crime and Disorder implications contained within this report.
Customer Consideration	There are no Customer Consideration implications contained within this report.
Carbon reduction	There are no specific Carbon Reduction implications within this report.
Health and Wellbeing	There are no Health and Wellbeing implications for the County Council.
Wards	All divisions.
